

# SOHAM — GURUKUL LEARNING FLOW & VOICE UI

Role: Gurukul Frontend Integrator

Mission: Make Gurukul feel like a talking teacher, not a website.

---

## READ THIS FIRST

No more silent text learning.

Everything a student sees must be:

- spoken
  - calm
  - adaptive
- 

## WHAT YOU MUST DO (4 Days)

### DAY 1 — Learning Mode Switch

Add in frontend:

```
mode = "learning" | "admin" | "ems"
```

Pass to backend with every request.

Deliver:

- visible mode indicator
  - backend receives it
- 

### DAY 2 — Vaani Playback

Implement:

- Play voice for:

- lesson generation
- edumentor replies
- chat answers

Deliver:

- Audio auto-plays
  - Replay button
- 

## DAY 3 — Voice UX

Add:

- pause
- replay
- slow / normal speech
- subtitle sync

Deliver:

- no broken audio
  - no overlapping voices
- 

## DAY 4 — Demo Guardrails

Lock:

- Only working screens
- Block Student / Parent EMS logins
- Hide broken routes

Deliver:

- demo\_mode = true flag
- clean navigation

---

## INTEGRATION

- Yashika — provides Gurukul LM + Vaani
- Rukayya — adaptive UX
- Akash — hosting + stability
